Single gantry automatic feeding manipulator

Performance Profile

The system consists of a set of laser cutting machine loading truss manipulator, CNC control system, vacuum control system, etc., and together with the laser cutting machine, it forms a sheet metal automated production unit. The task of automatic loading of sheet metal can effectively improve production efficiency and reduce production costs.

Equipment technical parameters

Specification	3015/4015/4020/6015/6020mm
Maximum load	300KG-1000KG
Air consumption	1.5m³/min
Air source	0.6-0.7Mpa
