Pneumatic cantilever loading manipulator

Performance Profile

This machine has the characteristics of lightweight structure, easy disassembly and assembly, and wide use. It has high efficiency and short transportation cycle. When loading, the operator can control the movement of the work piece in space with relatively small force and can stop at any position, making the transportation process easy, fast and continuous. High safety performance, equipped with gas interruption protection and anti top loading devices.

Equipment technical parameters

| product | Pneumatic cantilever loading manipulator | | |
|-------------------------|--|----------------------|----------------------|
| feeding plate thickness | 1-8mm | 1-12mm | 1-20mm |
| Maximum feeding format | 3000*1500mm | 3000*1500mm | 3000*1500mm |
| Minimum feeding format | 1250*1250mm | 1250*1250mm | 1250*1250mm |
| Maximum plate weight | 300KG | 500KG | 1000KG |
| Number of suction cups | 8 | 8 | 8 |
| Power mode | Pneumatic / Electric | Pneumatic / Electric | Pneumatic / Electric |
