

- trans Tower

Sheet metal automatic storage unit

Performance Profile

It enables centralized storage of plates, automatic weight detection, automatic warehousing, and automatic retrieval. Controlled by PLC and touch screen, it achieves classified visual management of plates, ensuring safety and efficiency. It effectively ensures product quality, improves production efficiency, and reduces production costs.

Equipment technical parameters

Specification	3015/4015/4020/6015/6020mm
Number of floors	Customization
Load per layer	3T/5T
mode of movement	linear guide rail + chain
transmission mode	chain drive
vertical lifting speed	9m/min
inlet and outlet speed	12m/min
plate support	optional selection
Number of storage units	Customization
